

ACS MediHealth HIM Scanning/Archiving

Achieve MORE with MEDITECH

ACS MediHealth, mobility collaborator with MEDITECH

Empowering caregivers to improve lives one patient at a time around the world.

ACS MediHealth has a unique relationship with MEDITECH to provide solutions and services that are tested and certified with MEDITECH Modules. Our objectives are to save you time, money and frustration during the peripheral selection and deployment process.

Scanning is the first step in building a truly electronic patient record. It is critical in the success of your EMR initiatives. Our purpose is to work with you to maximize value, productivity, and user adoption. This methodology is based on a four (4) step process: Review, Assess, Delivery and Deployment. **RADD-Capture**

Overview of service (RADD)

I. Review and Assess (RA)

- a. Product selection and sizing
- b. Environmental consideration review
- c. Document intake and profile considerations
- d. Image quality optimization

Deliverable – Recommended Configuration Document

II. Delivery Installation (D)

- a. Current driver and support software install
- b. Network and Administration configuration
- c. Target destination and application outline
- d. Device optimization

Deliverable – Properly installed device and reference guide

III. Deployment Training (D)

- a. Overview of scanner capabilities
- b. Review of software functionality
- c. Model specific device settings
- d. Tips and Tricks for successful scanning

Deliverable – Best Practice guide and Operator resource manual
